

ASKO Wine Climate Cabinets Range.

Technology meets tradition and take perfect care of your precious wine collection.

ASKO Wine Climate Cabinets are an innovative way to take care of wines and the closest thing you can get to a fully equipped wine cellar – but one that can be put anywhere. As truly smart products, they use cutting-edge design and technology to take care of wine. They provide perfect light conditions, UV light protection, humidity monitoring, and they are vibrations free. As fully connected devices with the various software functions, that include also a camera, mobile Connect Life app and connection to Vivino database, you can manage the wine collection easily and get all the necessary information on inventory fast and accurately.

Everything ASKO knows about storing wine in the best possible way can be found here – beautifully encased in a connected refrigeration cabinet, as unique as your own collection. It contains all the advanced care and storage features that a valuable wine collection deserves. It also comes with a companion app that is connected to Vivino, which provides a smarter, easier way to manage any collection.

Every stage of the winemaking process – from selecting the growing area, through cultivation, and then creation – calls for a real love of wine. The amount of care that goes into maintaining a vineyard is nothing short of amazing. For the people who do it, it is a passion. It is this passion and these wine artisans that ASKO wanted to pay tribute to.

A modern wine cellar.

Almost all of the integrated features in the ASKO Wine Climate Cabinets are inspired by wine cellars – which, for centuries, have been the epitome of wine care.

The range includes freestanding **ASKO Wine Climate Cabinet** that can hold a large collection – up to 190 bottles – in the right conditions for storing and serving. It contains three distinct temperature zones for different types of wine, each of which can be individually and meticulously controlled as they are perfectly sealed off from one another.

A number of advanced features designed to provide the kind of care that took centuries to learn, includes pure charcoal-filtered air, humidity monitoring and optimum lighting conditions. The glass door protects the contents from UV light. The high-quality compressor ensures consistent temperatures in each compartment and no vibrations, so that the wine bottles can rest peacefully.

Connect with your wine.

ASKO Wine Climate Cabinet is a truly smart product. Being a fully connected device, it catalogues the wine bottles and provides useful information about them. Managing a wine collection is made easy thanks to the companion app with Vivino integration. This provides access to vast database of wine information, so you can identify each bottle. The user

interface is equipped with a camera, which can identify individual bottles using the Vivino database that includes 12,000,000 different wines. After scanning and identification, the wine can be added to the inventory, along with its most important information. Information regarding tasting, storage, readiness to drink and much more can be accessed immediately.

The ownership experience is enhanced by the companion Connect Life app that makes all the functionalities of the wine climate cabinet available via smartphone – this means changing selected settings on the wine cabinet or searching through the inventory can be conveniently done anywhere. The mobile app can also be used to scan wines and add them to the inventory. Connecting the companion app to the Vivino database puts a world of information about tasting, storage, readiness to drink, and way more at your fingertips. It is your virtual sommelier that is always ready with a wide range of expert advice. It is also possible to add “notes” to special bottles – to help remember who gave them to you, or to act as a reminder about when they should be opened for a celebration.

Exclusive iF Gold Award 2021.

ASKO Wine Climate Cabinet is designed to be seen and displays all the functional elegance that characterizes ASKO's craftsmanship and care. The classically-styled, sophisticated telescopic wooden shelving system features chalkboard signs that you can use to label your own selections – adding a vintage touch to a very modern appliance. With its glass door and elegant handle, the cabinet's design lets it blend perfectly into a living space – at home, in restaurants, bars, tasting rooms and more.

The functional elegance that characterizes ASKO's cutting-edge design and technology led the jury of the prestigious iF DESIGN AWARD 2021 to grant the ASKO Wine Climate Cabinet the exclusive iF GOLD AWARD 2021 – placing it amongst the highest of all achievements within the creative industries in 2021.

The jury of 98 international independent design experts described the ASKO Wine Climate Cabinet as an exquisite piece of craftsmanship:

"This beautiful wine cabinet is an exquisite piece of craftsmanship. The entire wine experience has been meticulously planned to create a stunning showcase that wine aficionados will love. Every detail has been lovingly considered, from the quality of the joinery and accessories to the high-tech scanning of wine labels, storage options, cataloguing of the wines down to final selection, decanting and pouring."

Different zones designed to meet different demands.

Every wine collection is unique, so ASKO created a range of Wine Cabinets to suit different needs, and to care and store your wine collection into an art form.

The **ASKO Wine Aging Cabinet** acts either as a companion to the Wine Climate Cabinet or as a standalone piece. In it, up to 261 bottles of wine can be kept in the perfect conditions for long-term storage, in a way which protects them and lets their flavours and complexities develop.

The **ASKO compact undercounter models** are designed with one zone or two. They effortlessly integrate with any space and feature a handle-free door with a 'push to open' function, which is easy to use and delivers an elegant, seamless finish. The one zone Undercounter Wine Climate Cabinet can hold up to 44 bottles, while the two zone up to 38 bottles.

About ASKO Appliances.

The ASKO story started in the 1950s. A young farmer in Jung, south of Lidköping in Sweden, saw his mother's predicament: washing by hand is wet, cold, hard and heavy. He wished to ease her burden, so he invented his own machine – a sturdy, steady and reliable washer in cast iron and stainless steel. The beginning of ASKO was an act of love – no more, no less.

Today, ASKO is the market-leading Scandinavian brand of premium kitchen, laundry and professional appliances built on a proud 70-year heritage. ASKO products are developed by combining traditional craftsmanship, user-driven innovation and a passion for design. Since 1950, millions of professionals and home users on all continents have experienced the unique pleasure of ASKO appliances.

ASKO Philosophy.

The combination of everyday functionality, environmental concern and clean, pleasant lines is the principal hallmark of Scandinavian design – and ASKO. The fundamental idea is that carefully designed products should improve people's quality of life. To distinguish itself in a world of unnecessary and overly complex designs, ASKO aims for a soft, human-centric minimalism based on the principle of quiet being the new loud.
